

## Forest School news Term 5 2016

This term we've been experimenting with natural materials to create our own Stone Age art, made bows from hazel poles and string and tried out archery with some very accurate results!

We discovered long straight sticks make the best arrows and learnt the rules for safe practice.

The meadow is full of froglets and young toads, colourful beetles and wildflowers and new discoveries are made each week as the children explore the site.

Y6 children have excelled at den building and fire lighting and we've started making mallets, which they will finish next term.
