

FARMYARD HULLABALOO!

Knowledge Organiser Apple Class (EYFS)

What should I already know?

Talk about some of the things they have seen such as plants, animals, natural and found objects.

Fun Facts:

- Over 70% of land in the UK is used for farming.
- Most of food eaten in the UK is grown on our farms.
- There are over 200,000 farms in the UK.

Key Questions and Lesson focus

What is a farm?

We will discover what is on a farm by taking a walk with Rosie!
We will learn about the different buildings and machinery which makes a working farm.

Farm Produce

We will discover why farming is important to the production of certain foods, such as wheat, dairy, eggs, fruit, honey and meat.
How are these foods grown?

Animals on the farm

What do animals provide for us? We will look at the story of wool.

Caring for animals

What is the name of a baby pig? We will learn about the names of baby animals and how they are looked after on a farm.
How do you look after your pets?

Life cycles—the life of a frog

Animals like us have a life cycle; we will learn about the different stages of a frog. We will visit our pond in search of frog spawn.

Fairtrade

We will learn about how and where chocolate is grown. We will discover why it is important to offer Fairtrade to farmers abroad.

FARMYARD HULLABALOO!

We are gardeners... We will learn what we need to grow a plant from seed successfully, including our own crop of potatoes and beans. By the end of the topic we will know that you need soil, water, sun and care. We aim to visit Mike's Meadow to observe changes that take place during springtime.

Knowledge Organiser Apple Class (EYFS)

Vocabulary	Definition
Farm	A part of land use to grow crops and raise animals. There are dairy and poultry farms.
Crops	Crops are living plants grown by farmers. Most crops are foods such as grains, fruit and vegetables.
Fairtrade	Is about giving the people who produce foods a fair price for their work.
Farm Produce	Is the food we buy and eat that has been grown on a farm.
Soil	Soil is the upper layer of earth that we grow plants in.
Seeds	A seed is part of a seed plant which grows into a new plant.
Life Cycles	A life cycle is a series of stages a living thing goes through during it's life.
Frog spawn	Is a mass of eggs. These jelly like egg sacs can be found on the surface of ponds.
Tadpoles	Tadpoles are the first stage in a frogs life. It is a young frog that lives and breathes in water.
Spring	Spring is the season when cold winter temperatures begin to rise to the warmth of summer.
